AI-Powered Chatbot For The Rural Youth

BY QUEPPELIN

Disha Didi is a conversational chatbot developed by Queppelin for Ipas which is a 'Not for Profit' organization and dedicated to preventing and managing unwanted pregnancies, and ending deaths and disabilities from unsafe abortion. This Chatbot has improved and opened many barriers for IDF to spread information about SRH in rural areas and open a source of help for the women to ask questions which they couldn't ask someone on a personal level but can ask an AI bot without hesitating about such topics. It has also helped IDF to improve their online presence, since they are one of the very few NGO's who have taken a step using Artificial Intelligence in order to offer help to their users!
